The following compatibility tests listed above Vigor router models with USB 3.5G modems / mobiles. If you are using 3.5G modems / mobiles which are not included in the list, make sure you have the latest firmware version.

If it is confirmed as the latest and still does not work, please follow the steps below to install the Syslog tool to retrieve information, and provide us for solving your problem.

- (1) Check /download the Firmware version: <http://www.draytek.com/user/SupportDownloads.php>
- (2) Configuration for 3G connection: <http://www.draytek.com/user/SupportFAQDetail.php?ID=1943>
- (3) Setting the Syslog: <http://www.draytek.com/user/SupportTroubleDetail.php?ID=10>
- (4) Download Syslog Utility: <http://www.draytek.com/user/SupportDLUtility.php>
- (5) The compatibility may depend on local ISP settings.
- (6) ■ : This symbol indicates that the modem or mobile phone has been tested and **is supported** by the router.
◎ : This symbol indicates that the modem or mobile phone has not been tested but **might be supported** by the router.
△ : This symbol indicates that the modem or mobile phone has been tested but **is supported** by the router with specific circumstance.
∅ : This symbol indicates that the modem or mobile phone has been tested and **is not supported** by the router.

Please contact support@draytek.com if you have any problem.

If your modem works fine with Vigor router but not listed in current compatible table, please contact with DrayTek service center.

Remark

1. BandRich Bandluxe C100S : NOT USE in America Zone because C100S lacks 850/1900MHz.
2. Option GlobeSurfer i CON : Only for France and Poland.
3. Sierra AC312U : Firmware version N2_0_8_5ap. (<http://www.sierrawireless.com/>)
