### Full Feature 54Mbps Wireless Camera

AirLive Wireless Internet IP Camera is designed for Home and Enterprise users to enjoy the security and home networking entertainment advantages. It is simple to use with plug-n-play installation and wireless operation so you can install the camera anywhere. The web based configuration allows viewing of the images from the Internet in real time! The 802.11g now allows the camera to operate at 30FPS (QVGA) speed and up to 640x480(10fps) resolution, it makes the video amazingly life like for monitoring or archive purpose.

### Windows-based and Web-based Monitoring Utility

These tools allow users to access the Internet Camera from a remote site via Intranet or Internet. They also allow users to make configuration including image monitoring, recording images to a hard drive, viewing up to 4 cameras on one screen, snapshots and many others.

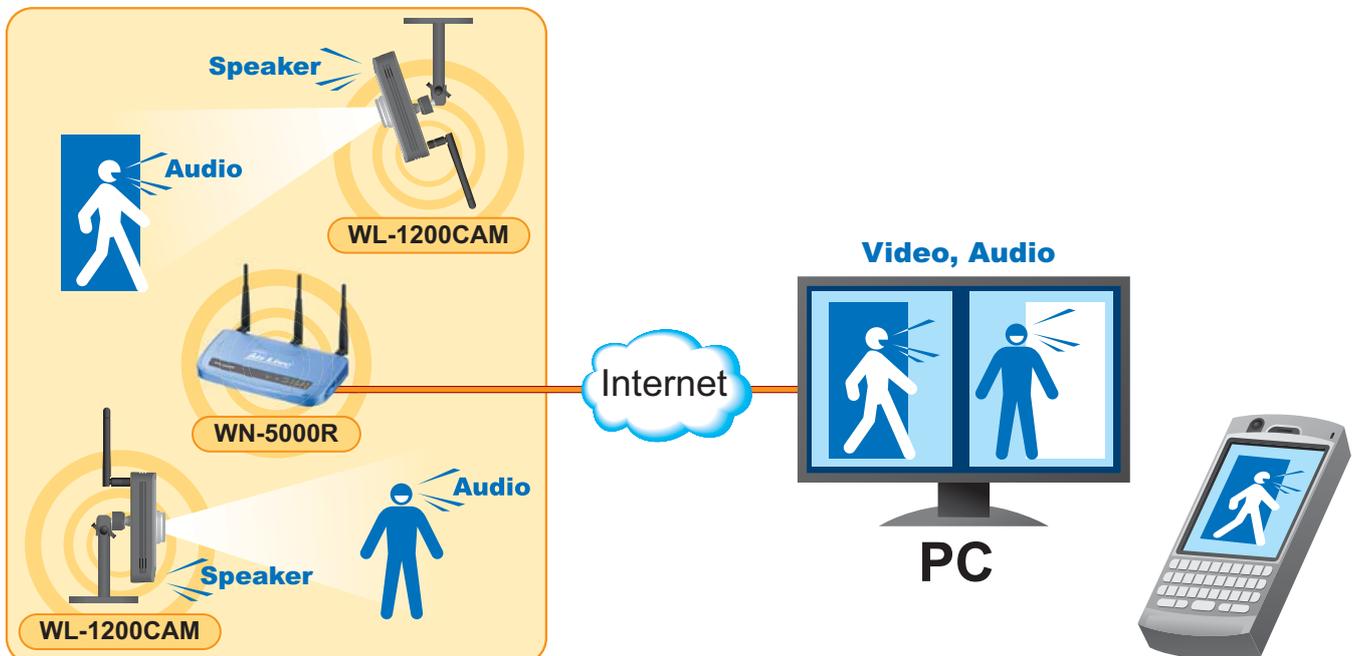

## Versatile Application

The camera is equipped with many advance functions for all type of applications. The motion detection function will trigger the auto record function and send users an email notification. It can even attach up to 3 images in the email so users will know the situation instantly without having to visit the site. For home users, you can monitor your young children from remote site to ensure their safety. With 640x480 resolution, you no longer have to second guess about the image on the screen.

Users can use the camera for video surveillance function. This camera also supports TCP/IP networking, SMTP e-mail, HTTP and other Internet related protocols. Another advanced feature for this camera is its

Powerful Camera Viewer application software for image capturing and video recording and it support both ActiveX control and Java applet for Internet Explorer. It allows your PC to manage up to 4 video cameras at the same time in motion sensor, scheduled or always recording mode.

## Support 2 Ways Audio

The WL1200CAM Internet Camera takes video surveillance to another level by using 2-ways audio. By connecting a powered speaker to the camera, you can now remotely talk to anyone at your camera site. And it also comes on the build-in microphone, so you can also hear the voice via the camera.

## Specifications

### Product

- 802.11g Wireless LAN Internet Camera

### CPU+DSP+RF

- Prolific PL-1029 + Ralink RT2561

### Flash

- 4MB Flash

### RAM

- 32MB SDRAM

### Image Sensor

- Micron MI-1320 1.3M Pixels CMOS Sensor

### Lens

- Manual Focus, F=2.8

### LAN Port

- 10/100M UTP Port x 1

### Power

- 12V DC, 1A Power Adaptor

### Dimension

- 113mm x 80mm x 43mm

### Temperature

- 0~45°C

### Humidity

- 10~90% (Non-Condensing)

### Certification

- FCC Class B, CE Mark
