ULTRA-EFFICIENT & FLEXIBLE

DS508 provides ultra-speedy data transmission and powerful computing capability, which is not only suitable for corporate environments that demand efficiency, but also a great choice for power users who massively access data on the server.

2 NETWORK INTERFACES

The 2 Gigabit LAN port design allows the DS508 to work in two subnets simultaneously or in one subnet with 2 different IP addresses. It is designed particularly for corporate environments utilizing more than one LAN.

WORK WITH WINDOWS ADS

DS508 is compatible with Windows ADS. Windows domain users are able to access data shared from DS508 when they pass the Active Directory authentication. This will greatly save your time on creating large amount of accounts for the domain users.

IP CAMERA VIDEO RECORDING

When connecting IP cameras to the network and recording the videos to the DS508, Surveillance Station provides you an economical network video recording solution. On Surveillance Station, you can watch the camera-monitored area on a real-time basis, and also view and manage the recorded video clips. Feel free to choose either the continuous or motion-detection recording mode that best fits your need.

FLEXIBLE STORAGE MANAGEMENT

DS508 allows you to create RAID 0, RAID 1, or RAID 5 volume on it. Also DS508 has the flexibility to assemble smaller hard drives first, and expand RAID 1 or RAID 5 volume by replacing existing hard drives with larger ones one by one when the budget is allowed. When the hard drives on DS508 are full, you can expand more storage simply by attaching an external hard drive to the USB port of DS508.

SECURITY ENHANCEMENTS

- Encrypted FTP allows you to transmit data using "FTP over SSL" or "FTP over TLS" option.
 - HTTPS support encrypts all HTTP connections with SSL transport mechanism.
 - Encrypted Network Backup ensures Network Backup is done with encrypted data transmission.
- You no longer need to worry about critical data being exposed in danger.
